

Desk dividers system

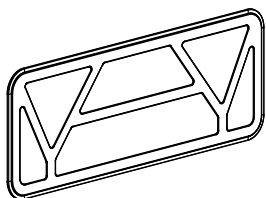

B1

B1 desk dividers allow to create individual workstations by visually separating one workplace from another one. It is their form, both lightweight and intriguing, and the natural material they are made from, which comes in a variety of colours, that will successfully break down the monotony in any office space. There are three interesting embossed patterns available – each one can be 160 cm, 140 cm and 120cm wide. These dividers can be mounted to various desks just with a clamp, without using any other tools. Thanks to that, they can be easily used in any other places or get dismounted. The design of these desk dividers is a perfect match for the solutions used in Balma PLUS

Features and characteristics:

- perfect match for Balma PLUS, Mixt, Simplic, G4, S4 office furniture systems
